

ITWS PROJECT

ONLINE MOVIES PORTAL

RACHIT GARG and AMAN RAI

The Experience....

There was a great fun working on this portal. We are very grateful to Massimo Di Pierro for putting up some very easy tutorials and video lectures online. We are sincerely thankful to our mentors who supported us at every stage. And last but not the least we would mention the name of our instructor of the course Mulualet Teku for embedding us with the basics of WEB2PY in such an elegant manner.

Environments

Present bugs

A registered user can upload a new movie, the movie gets first posted on the website and after that admin has the authority to delete the video if he finds its content malicious. The videos uploaded may not run in some browser.

Future Advancements

The website could be made more more user-friendly , and the above bugs could be fixed.
